

David Robison

We Washingtonians are seeing the effects of climate change pretty much every day. From wildfires and wildfire smoke, to disrupted agriculture, to loss of snowpack, to massive floods, to further threats to endangered species like our beloved resident orcas. It's up to us to help ourselves by incentivizing lower-carbon fuels and showing our fellow Americans what can be done.

My family strongly supports the Clean Fuels Program Rule and Air Quality Fee Rule, for our collective benefit and that of our grandchildren.

Thank you,
David Robison & family
