

Marjorie Reinig

Thank you for developing the Clean Fuels Program Rule and Air Quality Fee Rule. The environment and global warming has been THE issue I'm most concerned with for 30 years. It is good to see that the rule making committee is putting some teeth into this law--please ensure clean fuels rules create the strongest rule possible under the law toward decreasing the growth of global warming. Biofuels should only be derived by agricultural waste, not by crops. I would gladly pay extra taxes to ensure the trajectory of our already affected air quality and raised temperatures improve.
