

Joan Nelson

Dear WA Department of Ecology,

Thank you for the opportunity to comment on Washington's Clean Fuel Standard. I am very supportive of the draft Clean Fuel Standard and applaud the Department of Ecology for setting our/clean fuels trajectory to be the strongest possible per the law.

For me, as a person of faith, the Earth, its plants, critters and peoples are sacred. They/we are a manifestation of our Creator God. This is our community... the air we breath, the water we drink, the food we eat, the beauty we experience. It all functions together, interdependently.

Time is of the essence with our response to the climate crisis. Ambitious implementation of this law is critical for a just transition to clean energy that addresses our moral obligation to heal our climate and communities. Please ensure that the final rule maintains the strong carbon intensity standards of a 20% reduction by 2034.

In addition to the urgent need to reduce transportation pollution, I believe/how/we respond to the climate crisis is also a moral issue. It is imperative that utilities are held accountable to thoughtful and equitable reinvestments that further transportation electrification and reduce pollution in overburdened communities ♦ as required by the law./

I have faith that Washington can and will meet our greenhouse gas reduction goals through our gifts of innovation and dedication to stewardship. Thank you for putting us on that path and demonstrating our state's commitment to a clean energy future by implementing the strongest possible Clean Fuel Standard.

Sincerely,
Ms. Joan Nelson
