

Sue Ann Allen

Dear WA Department of Ecology,

Thank you for the opportunity to comment on Washington's Clean Fuel Standard. I am very supportive of the draft Clean Fuel Standard and applaud the Department of Ecology for setting our/clean fuels trajectory to be the strongest possible per the law.

As a person of faith, addressing our transportation pollution to co-create a more just and sustainable future is an important part of my call to live more lightly on Earth so that all may thrive.

As a Christian, I believe that I am called to be a steward of God's creation. We have used ♦ and used up ♦ the resources that make up our world, without thought of the consequences for the future.

Now we are on the brink. Disaster looms. We have hope only if we work together to turn our course around. This measure begins that important, essential, and to me, sacred, work.

Time is of the essence with our response to the climate crisis. Ambitious implementation of this law is critical for a just transition to clean energy that addresses our moral obligation to heal our climate and communities. Please ensure that the final rule maintains the strong carbon intensity standards of a 20% reduction by 2034.

In addition to the urgent need to reduce transportation pollution, I believe/how/we respond to the climate crisis is also a moral issue. It is imperative that utilities are held accountable to thoughtful and equitable reinvestments that further transportation electrification and reduce pollution in overburdened communities ♦ as required by the law./

I have faith that Washington can and will meet our greenhouse gas reduction goals through our gifts of innovation and dedication to stewardship. Thank you for putting us on that path and demonstrating our state's commitment to a clean energy future by implementing the strongest possible Clean Fuel Standard.

Sincerely,
Sue Ann Allen
