

City of Everett, WA

173-424-300 (vii) (A) states:

Registered entities that are charging electric vehicles must:

Provide ecology with a copy of a written contractual agreement demonstrating the registered entity acquired the designation of the first fuel reporting entity status

If an organization already owns the charging stations, why would this be required?

Recommend this wording be changed to "If the organization or agency owning electrical vehicle charging stations desires to have an third-party aggregator aggregate credits for reporting on their behalf, then the organization or agency shall provide ecology with a copy of a written contractual agreement demonstrating the registered entity acquired the designation of the first fuel reporting entity status.
