

William Tadlock

This is Ludicrous since we do not have the infrastructure to support electric vehicles in the state of Washington! You cannot drive from Bellingham Washington to Walla Walla on a single battery charge making it does a longer more expensive trip than driving with petroleum car. The number of trees and vegetation in the state of Washington consume all the CO that is admitted by cars currently. This will drive the economy of the state of Washington down and further into a recession. Though the admiration is good for zero admissions the reality does not support the goal.
