

Terry linville

Regarding the EV mandate and gas engine ban. This is unrealistic and unfair, will cost billions to implement and will unfairly penalize rural communities and working families.

We don't have the grid capacity to make this a reality, and even if we did we don't have the generation capability. This growth is only possible incrementally and the demand on the electric grid can only be met with innovation that hasn't happened yet.

Please don't try to force innovation, it will happen when the right combination of ideas come together.

Thank you,
Terry Linville
