

TERRY MCMILLAN

The batteries for electric vehicles are not ecologically friendly. They come from nasty mining operations. They are NOT recyclable. It would be more sound to make this bill for hybrid vehicles. The electric cars are priced so far out of most peoples budgets. You are going about this transition ALL WRONG ! But of course , you're going to ram this down our throats anyway. It's about getting your agenda ,people, don't matter ,just your egos !
