

Ron Tanzi

As a 7 year owner and user of an EV, I completely support the rule changes to Chapter 173-423 WAC – Clean Vehicles Program, and Chapter 173-400 WAC, General Regulations for Air Pollution Sources. But I am also disappointed that there is not more dedication to specific financial assistance to both fleet and individual vehicle owner-operators. Putting such a high financial burden on people during this transition will meet with resistance and ultimately, failure of this well intentioned and necessary change.

Thank you for receiving comments.
