

Chad Donaldson

Inslee's forced electric vehicles idea is ridiculous! The tech is no there. We're not even close. It takes hours to charge a vehicle, it takes power to do it. What happens when we have to do brown outs in the heat from climate change? Not to mention the costs to replace a battery. The disposal of the battery will also be a challenge. Inslee's insane...and so are you if you believe this fantasyland bs.
