

Sara Bhakti

Protecting the environment is my top priority.

I support, in Chapter 173-423 WAC, Clean Vehicles Program, expanding the adoption of California motor vehicle emission standards to include the Advanced Clean Cars II and the Low NOx Omnibus Rules (which includes the Phase 2 Greenhouse Gas Rules), adding a one-time fleet reporting requirement, and making other changes.

I support, in Chapter 173-400 WAC, General Regulations for Air Pollution Sources, updating the adoption date of federal rules and making associated changes in five sections, including retaining the current definition of "project emissions accounting" in the Prevention of Significant Deterioration Program.

Thank you for the opportunity to comment.
