

Tim Heenan

This is a horrible idea, it will not make any difference in the overall world carbon. I don't know why Washington always has to be first to do things. Most people can't afford ev, they Dontt go far enough, can't tow anything. Washington has terrible wind, ice, snow storms where power is knocked out every year. How you going to charge your dead car.I would not park a ev in my garage because of all the fires. Please use common sense in your decisions. Dont do anything because Inslee wants it.
