

## James Johnson Anonymous

Gentlemen: With the fire starting once again on several tesla cars this idea of no gas/diesel cars is silly and self destructive to our society. The idea that some governmental entity can restrict citizens ability to move around or travel will kill income, initiative, take away people's rights and stop our entire society. We will all be poorer including our decision makers . This is essentially a terrible idea. Apparently our enemies , those outside our borders , will not restrict much of anything when it comes to the use of coal, oil , gas, diesel etc.

Regards, Mr. and Mrs. James and Gail Johnson
