

Charles Michel

ACC II move us quickly to transition to clean electric cars. We need to commit to a gasoline-free future, and ACC II will help make affordable and economical EVs. It will save drivers billions of dollars on fuel and maintenance. It will diminish the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities. Vapors from gas stations and emissions from cars is a health hazard and costs us dearly in health care costs. We want 100% Clean Cars by 2030!
