Subject: Approve the Advanced Clean Cars II (ACC II) Regulation

The citizens of Washington want 100% clean cars by 2030. We need to commit to a gasoline free future. I am sure that you are getting immense pressure from the fossil fuel industry. Why is it that the industry that is responsible for disruption of the very planetary systems that keep all living beings functioning is given any voice in this matter? Please do your part to stop this insanity. The highly intelligent scientists at the Department of Ecology know what the best-available-science says about the dire future we face if we don't make bold decisions right now. The citizens of Washington State have your back.
