Hello, this comment does not appear to apply directly to this comment period; however, I am looking to comment on the Alternative Fuel Vehicles and Plug-In Hybrids Washington State Tax Exemptions. Can the state legislature increase this tax exemption to EV vehicles costing at least \$75,000 starting in January 1, 2023? I have noticed car manufacturers have recently increased their base MSRP \$\$ for EV vehicles, which has made this tax exemption obsolete, and I will not be able to utilize this benefit for purchasing a new EV vehicle. Thanks, Nick
