

Cheryl Linke

How can the people of this state afford you, or your ideas? We cannot.

People living on fixed income cannot afford an electric car, nor replacing batteries when they go bad.

Governor, you claim to care about the environment, but the stripping of elements to make these batteries are harsher for the environment than a decent vehicle(gas powered) hurts the climate.

You have no care for the environment, nor the people you claim to represent.

I didn't vote for you, and you do NOT represent the people of Washington.

I do not support your edicts.
