

## Frederick Chavre

If EVs are so great how come they must be mandatory. It is clear that there are many problems with electric vehicles at this time. Slave labor, strategic rare earths, massive pollution, lack of recycling for said batteries. I am 70 and we were stuffed with the belief that the free market was more efficient than a planned one. Did you lie to us? Or are you just a little full of yourselves? Getting on board with Biden is a mistake. The last two Presidents have been idiots. Slow down and let America prosper. No mandates necessary. Frederick Chavré of Maple Valley
