

Gerald Duggins

This is total garbage, and the Federal Government has ruled California's regulations to be illegal, electric vehicles have proven to be unreliable and a hazard to the environment not only from their manufacturing but also from their use of electricity and short driving range, then there is the high rate of them burning up which has caused manufacturers to put out a warning not to charge them or park them in an attached garage. Electric vehicles are not safe, and they also are not reliable. They do nothing to help the environment in fact they do more damage than anything else and they are not affordable for the majority of people. This is a total scam by a small number of people and by the government. I for one will if it comes to it file a lawsuit of its violation of my Constitutional rights.
