

William Osmer

I strongly support the proposal to update Chapter 173-423 WAC, Clean Vehicles Program and Chapter 173-400 WAC, General Regulations for Air Pollution Sources.

The proposed updates will:

- Ensure that automakers provide an increasing amount of clean, zero emissions passenger vehicles for Washingtonians. Additionally, automakers will be pushed to provide clean vehicles at a reduced price for community mobility programs (the Advanced Clean Cars II rule).
- Reduce harmful, smog-forming pollution from new heavy trucks through stronger vehicle standards (the Heavy-Duty Omnibus Low NO_x rule).
- Provide for collecting information on vehicle fleets in Washington to better shape future pollution-reducing policy (the Fleet Reporting Requirement).

Thank you for your attention.
