

Julie Stuht

As a taxpayer I want you to ban the mandate to own electric vehicles by 2035. It is unrealistic and causes an economic disaster. You can't force people to buy vehicles they can't afford. There are other issues involved with forcing this upon citizens. We have choices and we the people at the very last should be able to vote on this. You work for us. It is not the other way around. This should be a community decision not a few people on government.
