

William Berman

This is an assinine idea. It is an OBVIOUS power grab and attempt to take over a huge portion of the US economy (SOCIALISM!). Once you have effectively eliminated the gasoline and oil business, who is going to profit from selling the power to run people's cars? Ohhhhhhhhhh.....that's right the GOVERNMENT owns and runs the power grid! And for all of the ZOMBIES screeching about "climate change" and how this is necessary to "save the planet" you look and sound like a lunatic when you say those things while you are standing on a piece of ground (i.e. anywhere on earth) that was once covered by a sheet of ice ONE MILE THICK! Did fossil fuels melt that ice? IDIOTS!!
