RE: Chapter 173-423 WAC – Clean Vehicles Program, and Chapter 173-400 WAC, General Regulations for Air Pollution Sources.

California is a mess-I don't want to really do anything they do! In all seriousness, this is bad legislation that will hurt the economic well being of the businesses and citizens of this state, and all for a miniscule, if any, benefit to the environment. Why did we get rid of vehicle emission testing if everyday passenger vehicles are such a problem to the environment? This is only about control and ideology, not actual change or impact on a real problem. Let's use common sense! Thank you.
