

Christina Gilman

I strongly support the ACC II Regulation that would require new cars sold in Washington state to be electric. ACC II will help accelerate a quick, smooth and efficient transition to clean electric cars. By committing the state to a gasoline-free future, ACC II will help make affordable and economical EVs more available to all. It will save drivers billions of dollars on fuel and maintenance. It will diminish the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities.

We must act with urgency to reduce our collective use of fossil fuels. Clean cars are a piece of the puzzle and an essential one. Please approve this regulation so we can be taking the steps we need to address the climate crisis.

Thank you.
