

## Lorren Cooper

How do you think the power grid is going to handle all these EV's ?? Look what happened in California this summer. How are people on fixed income going to pay to have a charging system installed in their garage ?? How about low income people? Who's going to pay for road repairs when you have to have an EV.

This is about as STUPID as Inslee's new gas tax next year. Or as STUPID as Inslee wanting to breach the damn on the lower Snake River.
