

## Loren Rupe

This law is ridiculous and I hope that it causes all Democrats to be tossed in the next election! You are just going to kill the auto industry in Washington as everyone will just buy their cars in Idaho or Montana! There isn't enough electricity to charge all these electric cars, they don't drive far enough on a charge, and they don't like water as they are burning houses down in Florida after the hurricane! There are plenty of logical reasons but you just ignore them!
