

## John Garoutte

As a driver of an all electric vehicle i understand the want for more. But it is unlawful, and unconstitutional to force/ban combustion engines. We as proud Americans have the right to choose if want an EV, ZEV, or gas guzzler. the reality is no state can support 100% EV vehicles, it will cause a state crash of electricity when everyone plugs in at night. rolling blackouts will become normal. Workers missing work because they cant make it back ad forth due to not being able to charge etc. Its unrealistic and unlawful. DO NOT PASS THIS!!
