

Geoff Latimer

EVs are too costly and don't work for most families. Washington residents should be able to choose the vehicle that works best for them.

- The average EV costs \$66,000. This mandate will cost consumers and businesses BILLIONS.
- Creating the charging infrastructure to support this mandate will be expensive and could take years.
- The cost of electric grid upgrades needed for new EV charging loads, are unknown and could be in the BILLIONS.

This is too much to risk against a solution that is not proven for a problem whose cause is still debatable.
