

Philip Lehtinen

This mandate is totally dumb, even dumber is follow anything that California is doing. You politicians should think before you push us into this EV situation. Number one we don't have the infrastructure in place to handle the needed electricity to handle what we are already using and besides the fact that greens are already wanting to tear down our dams in exchange for windmills and solar. You people are REALLY Dumb. Besides a decision like this should be made by the taxpayers of this state not some socialist in olympia. Get a life and let the taxpayers make these decisions.
