

James Kinder

lease reject both of these proposed rule changes. They will hurt the poor, destroy jobs, and will do nothing to fight climate change. They violate our rights, and if there is any justice in the world, will cost regulators and politicians their jobs. It is unrealistic that our electric grid can be expanded to charge these vehicles, and doing so would hurt the environment by causing more mining of Cobalt and Lithium. Please reject these changes and let the change to electric vehicles evolve more organically, instead of by force.
