Subject: Approve the Advanced Clean Cars II (ACC II) Regulation

In Washington State we have been breathing bad air for over a month due to the changing climate. Prolonged summer drought and higher temperatures have allowed wild fires to burn and burn. Global climate change is caused by too much CO₂ in the atmosphere from burning fossil fuels. This means we must stop using fossil fuels in the transportation sector as soon as possible. We have the technology to do this and the ACCII regulation will help accelerate Washington's transition to a clean transportation sector. Please do the right thing and enact the ACCII regulation. ACC II will help accelerate a quick, smooth and efficient transition to clean electric cars. By committing the state to a gasoline-free future, ACC II will help make affordable and economical EVs more available to all. It will save drivers billions of dollars on fuel and maintenance. It will diminish the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities. We want 100% Clean Cars by 2030!
