

Billy Kemp

Subject: Approve the Advanced Clean Cars II (ACC II) Regulation

ACC II will help accelerate a quick, smooth and efficient transition to clean electric cars. By committing the state to a gasoline-free future, ACC II will help make affordable and economical EVs more available to all. It will save drivers billions of dollars on fuel and maintenance. It will diminish the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities. We want 100% Clean Cars by 2030!

This regulation is very achievable by all car manufactures and state governments. The inflationary Reduction Act has provided the necessary groundwork to move the US to an emission free auto industry by 2035 and removing all ties to OPEC.
