

## Nick Gourley

This mandate is unconstitutional in an effort to control "The People". There is no sufficient infrastructure to support going full electric. Having a plan in place for a future transition to do so for the environment is desirable. Using this tactic to steal money from citizens for the wealthy, politicians and special interest groups is unfathomable!!! Use the Billions and Trillions of dollars to invest in the infrastructure and R&D to make a sustainable system is ideal. However, all of this is disguised as "Zero Carbon Emmissions", which is totally bogus and unattainable, until all humanity is gone from the face of the earth.
