Subject: Approve the Advanced Clean Cars II (ACC II) Regulation

ACC II promotes a quick, efficient, and critically important transition to from gas- to electric-powered cars. By committing WA to a gas-free future, ACC II will make EVs more affordable and economical and save consumers billions \$s on fuel and maintenance. It will also reduce pollution and CO2 emissions, which adversely affect low-income individuals and communities of color. It urgent that we transition from a transportation system dependent on fossil fuels to one driven by cleaner sources of electric power. Thank you for your consideration.
