

## Pamela Crumpacker

I am retired and the State is asking me to go into debt and purchase an expensive car that I am not able to afford or the cost to maintain.

Plus, what is the State going to do with all the gas vehicles? I just purchased a brand new car that will last me for years to come. Is the State going to collect all the vehicles and throw them away in the landfills?

I am so against most of our States polices and I do not believe that our government in the State of Washington represents the majority of the people that live here.
