Attention Dept.of Ecology staff, leadership, WA democrat administration and legislature- your science is flawed as All Electric Vehicles pollute much more than 'true hybrid' technologies that utilize a combination of nickel metal hydride batteries internal combustion engines vs. lithium battery only technology. Your GREEN AGENDA is apparent, seriously flawed, and lacking true science data and void of common sense. Reverse course by listening to WE THE PEOPLE who have common sense and true scientific data. Your bureaucratic mandates are unconstitutional, and we will revolt as our USA Constitution declares it to be our duty.
