

Ken Russell

I strongly support the adoption of Advanced Clean Cars II, the Heavy-Duty Omnibus Low NOx Rule, and the Fleet Reporting Requirement.

These new regulations will help put our state remain in the forefront of changing our trajectory away from global ecological catastrophe. We must do all we can to turn away from fossil fuel use and find other alternatives.

This is also a health issue, exhaust from internal combustion engines are a persistent health hazard and cause many illnesses and deaths. The Fleet Reporting Requirement is an important piece of this regulation.

I strongly support this rule and thank the Department of Ecology for its hard work.
