

Jerry Heitzman

I'm an electrical engineer by degree and believe that this bill places the proverbial "cart before the horse"! Washington States current electrical infrastructure is insufficient to provide sufficient charging power for an all electric automobile state beginning in 2035! Get real!! Talk to some engineers! Talk to PSE and ask them if they are prepared to go all electric! Plug-in hybrids are a far more practical approach...if you rewrite your electric car rules so that PHEV manufacturers can sell their cars in Washington state.
