

Ray Stewart

You want to ban gas/diesel powered vehicles but haven't given any examples on increasing electrical production.

Tearing out electric producing dams is an answer? Solar doesn't work when the sun doesn't shine. Windmills don't produce when the wind doesn't blow.

And you refuse to address nuclear, the cleanest.

So right now you want everyone to switch over to electric with no real way to increase production, but put a massive burden on the grid.

Can you say brown outs and black outs? When I grew up people like you would be committed.

Have a good day.
