

James & Susan Barhitte

Hello! We strongly disagree with WA state government telling us what type of car we have to buy after 2035. Two points: Are you going to buy one for us? No doubt we will not have the money thanks to the current socialist USA government choices. Secondly, where are all the states going to discard all those dead batteries that will become a problem to the environment at some point? I sincerely urge the WA state government to reconsider this bad future policy!!
