

Tad Anderson

I hope this is the right place to comment on Advanced Clean Cars II (ACC II). Electric cars have three major advantages for society: (1) saves money to consumer over car lifetime (2) reduced local air and noise pollution and (3) no direct carbon emissions - moves us toward carbon-free economy. Besides, electric cars offer a superior driving and ownership (i.e. maintenance) experience - I know because my wife and I have owned one for 4 years now as our one and only family car. Please approve ACC II and help accelerate a quick, smooth and efficient transition to clean electric cars in Washington State. Thank you! Tad Anderson
