Approve the Advanced Clean Cars II (ACC II) Regulation

I'm driving an 18 year old Civic hybrid and can't afford to upgrade but would love to do so. Please accelerate transition to EVs and make them affordable and available to all.

ACC II will help accelerate a quick, smooth and efficient transition to clean electric cars. By committing the state to a gasoline-free future, ACC II will help make affordable and economical EVs more available to all. It will save drivers billions of dollars on fuel and maintenance. It will diminish the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities. 100% Clean Cars by 2030!
