

Mike Landau

Please stop this nonsense! Send it to the voters and let them decide. Stop forcing Inslee's agenda on us. I can't afford an electric car. I don't have the money to buy a car and upgrade my home's electrical system. I also worry about the reliability of the electric grid. We already are facing an energy deficit and the loss of load probability is increasing. People didn't agree with a GHG tax and the legislators forced it on us. Now you are forcing this crap on us. No thanks!!!
