

Karen Sturrock

You first. Buy an EV - without a subsidy. Try charging it through brown-outs or black-outs; a likely consequence of dam destruction, the demonization and closure of coal-fired plants, and the denial of nuclear as a viable option. Replace the battery- if you can afford it.

It is hubris to assume that technological advancements can be forced to evolve within an artificial timeline.

This imposition will only hurt Washingtonians. Do not do this.
