

Judy Frei

I am writing to you concerning the Department of Ecology deciding to mandate rules to ban gas powered vehicles to be sold in the state of Washington beginning in 2035.

I do not support this decision, period!

People in this state of Washington are feeling in hard to even live in this area. Unless people have \$250,000 plus a year income, many people will not only not buy a house, they will certainly not be buying a \$60,000.00 car.

There will certainly not be the infrastructure in place by 2035 to support a mass electric vehicle transportation system.

I hope common sense will take place and reconsider this 2035 year decision.

There are many factors in this decision.
