

Patrick Young

In order to achieve the goal of a ICE-Free state by 2035, all such vehicles must be replaced by then. Please send me a full and complete detail how you will achieve this goal and where will you get the oil and energy to replace such a feat? I have yet to discover anything used by man that has not come from fossil fuels, hydro (fossil fuels), nuclear (fossil fuels), wind (fossil fuels), and solar...also fossil fuels. Once you have explained in detail your step by step process, then and only then will I give up my ICE vehicle. Currently, you haven't even come close since you began your mission in 1975. I would say you have at least 200 years to go before such a goal is achieved.
NO ON Chapter 173-423 WAC and Chapter 173-400 WAC.
