

Steven Blomquist

The "rule" represents an enormous intrusion of government in the lives of the people of Washington. The zev technology is greatly damaging to the global eco-systems that harbor the rare earth minerals required to produce the batteries for ZEVs. Boo Hiss. The rule should be put to the vote of the people at least to those tasked with representing the people. This rule does not make it possible for me to pursue life, liberty, and happiness with my truck to pull my 40ft RV. The 16 states supporting this stupid thinking including CA need to take a long walk on a short pier!!!
