The electric vehicles (EV) mandate and gas engine ban are unrealistic and unfair.

- EVs are too expensive for most families with an average cost of \$66,000.
- EVs are not practical for long distance road trips.
- The EV infrastructure is not yet in place and is too expensive to implement.
- Production of batteries for EVs requires about the same amount of fossil fuels as gas-powered vehicles and does not support your green policies.
- Rural communities and working families are unfairly penalized.

Washington residents should be able to choose the vehicle that works best for them.
