Approve the Advanced Clean Cars II (ACC II) Regulation

I drive an electric car and we need a smooth and efficient transition to clean electric cars. We need to make affordable and economical EVs more available to all. It will reduce the air, water, and climate pollution that disproportionately impacts communities of color and low-income communities. There also needs to be improvements in the charging structure to support these cars. I have found either no or broken chargers when I have tried to make longer trips with my car. We need to move forward to electrify our transportation system. Thank you.
