

Crystal Dressler

No thank you! Have you not been keeping up on what's happening in California?

Please tell me how you plan to execute this? Are we to have electric fire engines, ambulances, helicopters, planes, boats, ferries, trains, jets, semi's, farm equipment, tractors, lawn mowers, motor homes, motorcycles,... how is that going to work? Or is the government also planning on controlling the worlds food supply by not allowing farming?

You want to put this through in Seattle, go for it, but leave us country folk alone! We want no part of this! And how about you start with your private jets and limos, you don't need those, if fact, I don't see why governor Inslee doesn't just ride a bicycle everywhere, he could save us all.

You're tearing this country apart! We already had one civil war to gain freedom from government control, I don't want to have another!
